Product Description

- **3-IN-ONE COMPLETE PROTECTION AGAINST ZIKA BEARING MOSQUITOES:** effectively repels, kills adults and kills larvae
- **USE AS MOSQUITO REPELLENT:** effectively repels Asian tiger mosquito & **yellow fever mosquito**
- **USE AS MOSQUITO ADULTICIDE:** kills 100% of mosquitoes on contact. Can be used for both personal protection and perimeter treatment.
- **USE AS MOSQUITO LARVICIDE:** kills 100% of mosquito larvae in stagnant water with 2 weeks residual

- **NATURAL & NON-TOXIC:** child, pet, bird and fish friendly. Can be used both indoors and outdoors. None staining. Pleasant scent.

EcoRaider Natural Mosquito & Flying Insect Killer is all you need to protect your family this summer against Asian tiger mosquito & yellow fever mosquito that spreads zika, malaria, dengue, West Nile, virus, chikungunya and yellow fever. Proven by leading university vector science center, EcoRaider not only effectively repels, but also kills 100% adult mosquitoes by contact instantly. When applied in stagnant water, it not only effectively kills 100% of existing larvae, but also keep two weeks effectiveness in killing new larvae. EcoRaider is a plant based non-toxic aqueous bio-insecticide. Its unique mode of action is lethal to target insects but does not affect humans, animals, birds and fish. It is a minimum risk pest control product that is safe to use around children and pets for indoors or outdoors.

Direction for Use:

EcoRaider Mosquito and Flying Insect Killer not only repels, but also kills adults and eliminates larvae in the breeding habitat before they can mature into adults and disperse. The treatment of breeding habitats helps reduce the adult mosquito population in nearby areas.

As Repellent:

Spray areas where mosquitoes need to be repelled, spray clothing when wearing for personal use, spray screens, windows and perimeters of the residence – also spray under bushes, around houses, in damp areas, and under appliances and around pipes.

As Adulticide:

Spray anywhere mosquitoes are spotted – adult mosquitoes are most active from dusk until dawn and they are less active in the sunshine. Spray the perimeter of a residence, spray on and around perimeter vegetation (avoid leaf burn) and spray in any standing water.

As Larvicide:

Spray into stagnant water bodies around residence. The product should be applied to standing water including fountains, bird feeders, catch basins, trench drains and other areas where mosquitoes can breed.

Product Detail

Contains: Lemon Grass Oil, Natural Geraniol, and other GRAS (Generally Recognized as Safe) inert ingredients.

Size: 16 FL. OZ (480 ml)
